

Evaluating Education and Training Services: A Primer

Charles Dennis Hale, EdD, MBA & Douglas Astolfi, PhD
2015

Evaluating Education and Training Services: A Primer

Charles D. Hale, EdD, MBA
Professor, Education & Management

&

Douglas Astolfi, PhD
Professor, History

Saint Leo University
P. O. Box 6664 * St. Leo, Florida 33574

3rd Edition

2015

Dedication:

For My Wife, Yaqiong “Wendy” Yang Hale (CDH)

For My Daughters, Kate and Maggie Astolfi (DMA)

Note to Reader

Significant effort has been made to properly cite sources accurately and completely. If errors or omissions are noted, please email the senior author at charles.hale@saintleo.edu. Links to webpages were current as of January 1, 2015; if a link is broken, please email the senior author; it will be replaced as soon as possible.

Table of Contents

Chapter 1 Evaluation Research: An Introduction	1
The Learning Organization	1
Program Theory Driven Evaluation	7
Tyler's Goals Oriented Evaluation Process & the Kirkpatrick Evaluation Framework	20
Review Questions	21
References	22
Chapter 2 Psychometrics: Measurement	24
Measurement Basics: Concepts + Constructs = Theory	24
Measurement Basics: Variables	27
Program Evaluation Questions and Hypotheses	42
Review Questions	49
References	53
Chapter 3 Psychometrics: Reliability & Validity	54
Classical Reliability Indices	54
Validity Indices	64
Direct Performance Assessment Reliability and Validity	70
Review Questions	73
References	77
Appendix 3.1 Group Contribution Index	78
Chapter 4 Constructing Questionnaires & Indexes	80
Constructing Instruments	80
Selecting & Writing Measurement Items	89
Review Questions	95
References	98
Appendix 4.1 Strategies Used for Assessing Student Learning Survey	100
Appendix 4.2 Supervisor Communication Effectiveness	102
Appendix 4.3 FRM 100 Foundations of Learning and Knowing Student Survey	103
Appendix 4.4 Student Tutoring Satisfaction Survey	105
Appendix 4.5 Self-Concept Scale	106
Appendix 4.6 Likert Scale Item Response Formats	107
Appendix 4.7 Recommendations for Constructing Indexes	109
Appendix 4.8 The Attitude Taxonomy	117
Appendix 4.10 Scoring & Reporting Quantitative Items	125
Chapter 5 Psychometrics: Constructing Tests & Performance Assessments	131
The Mechanics of Achievement Test Construction	133
Constructing Select Response Items to Assess Knowledge, Comprehension, and Application	146

Constructing Restricted and Extended Response Items to Assess Analysis, Synthesis, and Evaluation	156
Statistical Strategies for Improving Select Response Test Items (Item Analysis)	159
Constructing Direct Performance Assessments	163
References	172
Appendix 5.1 Classroom Assessment: An Introduction	175
Appendix 5.2 Interpretative Exercise Example	190
Appendix 5.3 Task Specific, Analytical Scoring Rubric	192
Appendix 5.4 Group Contribution Checklist	195
Appendix 5.5 Skill Focused Scoring Rubric	196
Appendix 5.6 Presentation Rating Rubric	197
Appendix 5.7 Preparing Examinees for a Testing Session	199
Chapter 6 Evaluation Research Design: Literature Synthesis	206
Comparing the Traditional Literature Review, Meta-Analysis, and Best Evidence Synthesis	206
Constructing a Literature Review or Synthesis	208
Evidence-Based Research: A Brief Introduction	216
The Evaluation Research Process, Plan, and Report	218
Review Questions	223
References	225
Appendix 6.1 Data Sources: Evaluation, Social Science, & Business	227
Appendix 6.2 Framework for Assessing and Evaluating Research Articles	235
Appendix 6.3 Budgeting Basics	239
Chapter 7 Evaluation Research Design: Critical Issues	246
Controlling Bias in Evaluation Research Design	247
Internal and External Evaluation Design Validity	249
Sampling in Evaluation Research Design	258
Review Questions	265
References	267
Chapter 8 Evaluation Research Design: Options	267
Pre-experimental, Experimental, Quasi-experimental, & Survey Designs	267
Qualitative Evaluation Research Designs	281
Specialized Designs	293
Review Questions	294
References	300

Chapter 9 Statistical Foundations: Descriptive Statistics	305
Data Interpretation: Tables and Figures	307
Data Interpretation: Rates, Ratios, Proportions, and Percentages	315
Data Interpretation: Measures of Central Tendency, Skewness, & Dispersion	317
Review Questions and Application Exercises	324
References	327
Appendix 9.1 Common Math Symbols	327
Chapter 10 Statistical Foundations: Hypothesis Testing	328
Introduction	328
The Logic of Hypothesis Testing	330
Single and Two Sample Cases	335
Estimating a Population Parameter using Confidence Intervals	344
Review Questions	347
References	349
Chapter 11 Statistical Foundations: Association, Prediction, & Chi-Square	350
The Correlation (AKA the Zero Order Correlation)	350
Simple Linear Prediction	355
Chi-Square (Analyzing Nominal Data)	358
The Point Biserial Correlation	371
Review Questions	373
References	376
Chapter 12 Statistical Foundations: Analysis of Variance (ANOVA)	377
ANOVA Basics	377
One-Way (Factor) Independent Groups ANOVA	379
One-Way (Factor) Correlated Groups ANOVA	384
Factorial Analysis of Variance	388
References	405
Chapter 13 Statistical Foundations: Ordinal Data Analysis	406
Introduction	406
Spearman Rank Order Correlation Coefficient (r_s)	407
Wilcoxon Matched Pairs	408
Mann-Whitney U Test	412
Kruskal-Wallis 1 Way ANOVA	415
Friedman 2 Way ANOVA	418
Review Questions	424
References	424
